Line Video Summary

Supplemental evidence submitted by supplier on 2024-03-26.

Observation

The screenshots below were extracted from the supplemental line video. The visible tooling label remains JIG-12 in both frames.

Frame A – line overview, fixture label still reads JIG-12.

Frame B – close-up of the same fixture, label still reads JIG-12.

Conclusion

This supplemental material does not resolve the original tooling-change concern. It is consistent with the earlier line photo rather than with the 8D claim that JIG-15 has already been installed.
