Re: Letter of Recommendation for Wei Liu

Dear Admissions Committee,

I am writing to recommend Wei Liu for your PhD program in Computer Science. Wei has been an undergraduate researcher in my group at Tsinghua University for two years, focusing on natural language processing and information extraction.

Wei developed an innovative contrastive learning approach for document-level relation extraction that was published at ACL 2024. He also made significant contributions to our few-shot named entity recognition project, resulting in a paper at EMNLP 2024. Both papers were primarily driven by Wei's ideas and efforts.

Wei has strong mathematical foundations and excellent programming skills. He is proficient in PyTorch, Hugging Face Transformers, and has experience with large-scale distributed training.

Beyond research, Wei served as a teaching assistant for our Introduction to NLP course and received excellent evaluations from students.

Wei is in the top 20% of students I have supervised. I believe he will thrive in a research-focused PhD program and make meaningful contributions to the field.

I recommend Wei without reservation.

Sincerely,

Professor Zhiang Chen
Associate Professor, Department of CS&T
Tsinghua University, Beijing, China
